UNEP Live makes accessible country reporting obligations and facilitates national reporting with its Indicator Reporting Information System

UNEP Live Principles

Data and knowledge are:

- available on-line without restrictions
- managed as close as possible to source
- collected once and shared with others for many purposes
- readily accessible to facilitate reporting of obligations
 - comparable at the appropriate geographic scales
 - accessible to allow experts to do an integrated analyses of environmental, social and economic data

UNEP Live is for:

- Government Ministries who collect and use data for reporting
- Government Ministries who monitor the state and trends of the environment
- The United Nations system
- Policy-makers who want to know the state and trends of the environment
- Assessment practitioners
- Major groups and stakeholders interested in environmental information

UNEP Live contains

Web intelligence portal

SDG synergies portal

Near-real time maps
